

SkimPro™

The SkimPro™ Tower Vented Skimmer Basket is priced to have a suggested retail comparable to an original equipment replacement basket and still offer a reasonable margin to the distributor and the retailer or pool service company.

Features, Advantages and Benefits

The patented SkimPro™ Skimmer Basket features a tower vent design that allows water to circulate through the skimmer even when leaves and debris fill the basket. This helps protect pump motors and prevent algae formation.

The SkimPro™ also provides a handle that allows removal of the basket without reaching underwater.

Available in three models:

The SP-HP fits most skimmers. Order the SP-HP if you have a Hayward 1070, PacFab, SwimQuip, Sta-Rite, American Products (with the flap weir) or Jacuzzi Deckmate.

Order model SP-HP1080 if you have a Hayward 1080 series skimmer (the 1080s have two large tabs in the skimmer that are used to secure the lid).

Order model SP-B if you have a Baker skimmer.

The dimensions on the three baskets are:

Model Number	Dimension A	Dimension B	Dimension C
SP-HP	8 7/16	6 1/8	12 15/16

This is the most universal basket. It fits the Hayward 1070, PacFab, Jacuzzi Deckmate, SwimQuip, American (with the flap weir) skimmers.

SP-HP 1080	7 15/16	6 1/8	12 7/8
-------------------	----------------	--------------	---------------

This fits a Hayward 1080 (The Hayward 1080 Skimmer has two large tabs that are used to secure the lid with screws).

SP-B	7 15/16	6 1/8	18 1/2
-------------	----------------	--------------	---------------

This fits a Baker Skimmer (The Baker skimmer is a deep skimmer. It also has a clear dish “control” plate that fits on top of the basket area. This control plate is removed when using the SkimPro™).
